### **General Information**

In general, for taxable years beginning on or after January 1, 2015, California law conforms to the Internal Revenue Code (IRC) as of January 1, 2015. However, there are continuing differences between California and federal law. When California conforms to federal taxlew changes, we do not always adopt all of the changes made at the federal level. For more information, go to ftb.ca.gov and search for conformity. Additional information can be found in FTB Pub. 1001, Supplemental Guidelines to California Adjustments, the instructions for California Schedule CA (540 or 540NR), and the Business Entity tax booklets.

The instructions provided with California tax forms are a summary of California tax law and are only intended to aid taxpayers in preparing their state income tax returns. We include information that is most useful to the greatest number of taxpayers in the limited space available. It is not possible to include all requirements of the California Revenue and Taxation Code (R&TC) in the instructions. Taxpayers should not consider the instructions as authoritative law.

### A Purpose

Use form FTB 3885P, Depreciation and Amortization, to compute depreciation and amortization allowed as a deduction on Form 565, Partnership Return of Income. Attach form FTB 3885P to Form 565.

Depreciation is the annual deduction allowed to recover the cost or other basis of business or income producing property with a determinable useful life of more than one year. Land is not depreciable.

Amortization is an amount deducted to recover the cost of certain capital expenses over a fixed period.

### B Federal/State Calculation Differences

California law has not always conformed to federal law with regard to depreciation methods, special credits, or accelerated write-offs. Consequently, the recovery periods and the basis on which the depreciation is calculated may be different from the amounts used for federal purposes. Reportable differences may occur if all or part of your assets were placed in service:

- Before January 1, 1987: California disallowed depreciation under the federal Accelerated Cost Recovery System (ACRS). Continue to calculate California depreciation in the same manner as in prior years for those assets.
- On or after January 1, 1987: California provides special credits and accelerated write-offs that affect the California basis for qualifying assets. California does not conform to all the changes to federal law enacted in 1993. Therefore, the California basis or recovery periods may be different for some assets.

California law does not conform to the federal law for:

- IRC Section 168(k) relating to the depreciation deduction for certain assets.
- The enhanced IRC Section 179 expensing election.
- The expanded definition of IRC Section 179 property for certain depreciable tangible personal property related to furnishing lodging and for qualified real property for improvements to nonresidential real property.

Additional differences may occur for the following:

 Luxury Automobile Depreciation: Sport utility vehicles and minivans built on a truck chassis are included in the definition of trucks and vans when applying the 6,000 pound gross weight limit. However, California does not conform to the federal modifications to depreciation limitations on luxury automobiles (IRC Section 280F).
